

## Engineering Virtual Domain-Specific Service Platforms

Specific Targeted Research Project: FP7-ICT-2009-5 / 257483

### Public Website

#### *Abstract*

*This document describes the setup of the public website for the project.*

Document ID:	INDENICA – D6.1
Deliverable Number:	D6.1
Work Package:	6
Type:	Deliverable
Dissemination Level:	PU
Status:	final
Version:	1.0
Date:	2010-12-31
Author(s):	Andreas Rummler (SAP)

Project Start Date: October 1<sup>st</sup> 2010, Duration: 36 months

## 1 Public Website

As a first dissemination activity of the project a public website has been set up. The following domains have been registered for the project:

- indenica.eu
- indenica.net
- indenica.org

where the domain indenica.eu will serve as the main domain.

For the implementation the open source Content Management System TYPO3 (see <http://www.typo3.org>) has been used.

Currently, only basic content has been put online. The following four sections have been defined:

- Home
- About the Project
- Partners
- Publications

The content will be updated and extended as soon first results become available.

The design of the website has been created by SAP Research Communications and is closely aligned with the project logo and its colors. The figure below shows a screenshot of the design:
